

How to use the various adjustment handles

During your bath time to soothe travel fatigue, enjoy not only a handheld shower and overhead shower but also a waterfall feature and a spacious bathtub where you can stretch out your legs.

1

waterfall shower handle

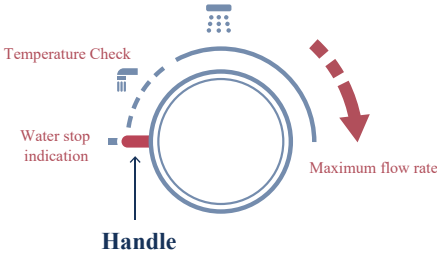

Turning the lever to the right will dispense warm or cold water from the overhead shower.

The dotted area indicates where hot and cold water will flow from the faucet below for temperature verification.

2

Overhead shower

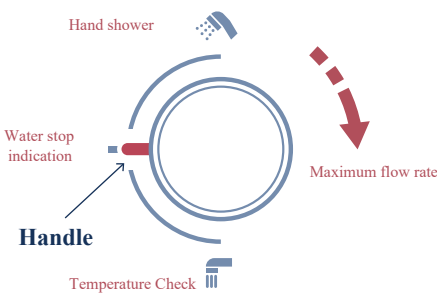

Turning the lever to the right will dispense warm or cold water from the overhead shower.

The dotted area indicates where hot and cold water will flow from the faucet below for temperature verification.

3

Hand shower

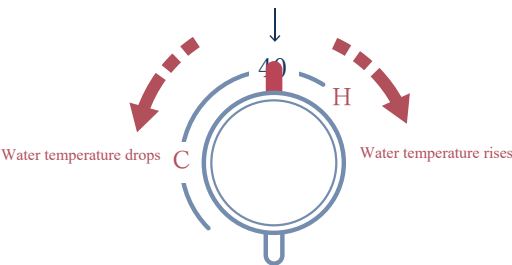

Turn the lever up for the hand shower.

Turning it downward dispenses hot or cold water from the lower faucet.

4

Temperature control

scale mark 「40」 : Optimal temperature

Turn toward "H" for hot water.

Turn toward "C" for cold water.
