

# How to use the various adjustment handles

After a long day of travel, unwind in the bath with not only a handheld shower and overhead shower, but also a body shower and foot shower.

1

## Overhead Shower Handle

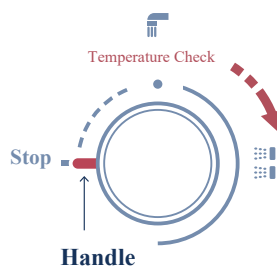

Turning the lever to the right will dispense warm or cold water from the overhead shower.

The dotted area indicates where hot and cold water will flow from the faucet below for temperature verification.

\* After use, return the lever to the "Stop" position.

2

## Body shower · Foot shower

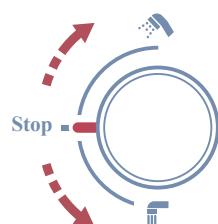

Turning the lever to the right dispenses warm or cold water from the body and foot shower.

The dotted area indicates where hot and cold water will flow from the faucet below for temperature verification.

\* After use, return the lever to the "Stop" position.

3

## Hand shower

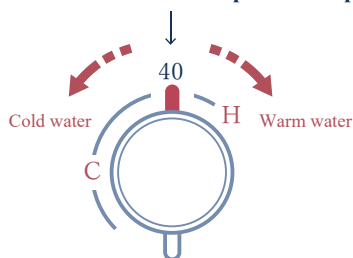

Turn the lever up for the hand shower,

Turning it downward dispenses hot or cold water from the lower faucet.

## Temperature control

scale mark 「40」 : Optimal temperature

Turn toward "H" for hot water.

Turn toward "C" for cold water.
