### How to use a fire extinguisher

1 When moving, hold the lever at the bottom.

2 Pull the yellow pin upward.

3 Point the nozzle at the source of the fire.

4 Squeezing the lever releases the fire extinguishing agent from the nozzle.

In the event of a fire, please make sure you understand [how to use a fire extinguisher](#) so that you can quickly put out the fire in its initial stages. If the flames have reached the ceiling, give up on initial fire extinguishing attempts and evacuate immediately.
